Boston University	3.72			Yes	Yes	7	8			Fordham University, Santa Clara University	Do not stress on grades too much, enjoy living in the present
Boston University	3.7	1380		Yes	Yes	10	4	Riverside		Boston	It's okay to pursue something that is not in STEM. Focus on the things you like and don't let your peers, parents, or teachers shame you for that. Your grades DO matter so keep up your GPA. Try to maintain your unweighted GPA above 3.8 so your life is easier. Take AP classes! They're more interesting and you can get college credit! It can also raise your weighted GPA so always choose AP over regular courses. Also at DBHS you're going to have to self study a lot. Don't expect your teachers to teach/help you. Be independent and get outside help, get study material, or use khan academy. Do your homework at school or during class so you have time for extracurriculars. Do extracurriculars you like! Don't force yourself to do something you don't enjoy. Doing illegal things is not cool or fun. You can get into a lot of trouble or you could hurt yourself. Don't be shallow. It's ok to not peak in high school.
Brigham Young University	3.7			No	No	4	2			Brigham Young University	Try your best
Cal State University, Fullerton	3.6 or 3.7			Yes	No	2	3	Santa Cruz			study for aps weeks in advance
Cal State University, Fullerton	3.8			No	No	3	4		Los Angeles		Manage your time well, get involved, know that school is important but so is having fun! Friends and opportunities always come and go, but it's not something to be sad over because it's apart of life. Make the most of the time you have and put your happiness first. Always remember at the end of the day, what you think of yourself is the most important — other's opinions shouldn't influence what you truly want or believe because it's your life to live. You can't call it your life until you stop living for others. It's okay to not have things perfectly figured out as we're meant to change and grow in all parts of our lives. So much easier said than done, but try your best not to overthink too many things. Spend more time enjoying what's in front of you instead of dwelling on 'what if's'.
Cal State University, Fullerton	3.5			No	No	2	1	Riverside	Los Angeles, Cal Poly, Pomona, San Bernardino		Don't join extracurriculars that you're not fully interested in

Chapman University	3.85 	1300		Yes	No	6	6	Riverside	 Long Beach, Cal Poly, Pomona, Cal Poly, San Luis Obispo	Chapman University, Santa Clara University 	Academics: I crammed four AP's into one year while also doing sports and it was a struggle. I suggest that you be aware of how much work you can and are willing to handle. Enjoy the freshmen and sophomore years because those are the easier ones academically. Once you get to junior year it's basically nonstop work and responsibility. Extracurriculars: If you're doing a sport, enjoy your time in it but be prepared to invest a lot of time into it. Your coaches might demand a lot of time that can conflict with school work. If this happens, you need to be a quick and efficient worker or be prepared for a lot of late nights. I would also recommend getting involved in a few service clubs and getting on their officer boards instead of just being a regular member of a bunch of clubs. The experiences you gain from being a leader can give you things to write about on college essays.
Chapman University	3.83			Yes	No	5	5	Davis 	Cal Poly, Pomona	Chapman University	Don't try to get into a prestigious school for the name or for your parents. Do research and find out what career you ACTUALLY want to go into and find the best schools that cater to or specialize in it. This is your life and you need to make your own decisions and live it to the fullest. You don't have to apply to a bunch of colleges either. It's good to have backups, but if you know that you really don't want to or won't go there anyway, then don't apply just to apply. If money is an issue, look into other scholarship programs besides the one that colleges offer. Also don't get too fixated on being the best or having excellent grades because you should still be able to enjoy your youth so go have fun sometimes!
Chapman University	3.8	1260		Yes	No	5	4	Santa Cruz	Northridge	Chapman University, University of Southern California, ^{Syracuse} Mount Holyoke, Syracuse, Chapman.	Make sure to not put school before your well-being. Your free time should be reserved for you and not other things.

Mt. San Antonio College	3.78	1140	NA	No	No		3	Riverside	Long Beach	Drexel University (PA), University of San Francisco	Do what's best for yourself and your goals. If you are planning to go to a Cal State or Community College but your friends are aiming for Ivy League level universities, don't beat yourself up if you aren't taking the same classes as them. DBHS is a highly competitive school and it's easy to get stuck in the DB bubble. If you think the classes you are taking are rigorous enough compared to your peers at DB, you might be in the top percent of students in another school. The classes you take aren't a direct reflection of you or your intellect, as long as you are putting in the effort and learning no one can fault you on that. Don't overload yourself or bring unnecessary stress into your life. Just because your friends are taking 5 AP courses in a year doesn't mean you should; and it doesn't make you any less of a successful student than they are. And while it's important to remember that throughout high school, it's even more important to remind yourself to do what's best for yourself when the transition from high school to your future begins. At DB, you might come across some folks that have a bad connotation with any plan that isn't a 4-year private university. Their opinions might make you belittle your plans but just remember to do what's best for you. Not everyone can think of attending a 4-year without fearing the stress of changes or debt. You don't need numerous clubs and extracurriculars to get into a good college. Just choose a few that you're passionate about and focus on those, or else you won't have time to sleep and you'll be overly-stressed. Also, don't procrastinate on college apps or anything college related. It's better.

Don't worry about joining too many volunteer clubs, unless you are applying for ivy leagues it is not important to be heavily involved in many clubs at once and that time can better be put into thinking about your major and the prerequisites you should fulfill. Try not to apply for extremely competitive majors unless you are very sure you are the top pick for those schools otherwise your chances of getting in will be very slim.

It's important to do your best, but never allow the work to compromise too much of your mental health. Not getting into your dream school is not the worst thing that can happen to you... there are so many viable options out there. Now that it is my senior year, and there is a global pandemic that prevents me from doing much, I look back on the past couple years and think, "Wow. In hindsight, why did I let my grades get to me so much? I should have enjoyed more of my time." Never beat yourself up when you can be so much happier. Everything tends to work out because there are SO many paths you can take, so don't limit yourself and don't freak out.
